

## **Drutt Corporation Selected as Technology Supplier for Tele2's New Wap Portal System**

**To enable Tele2 deploying its mobile commercial services portal to subscribers in the Tele2 networks.**

**Stockholm, Sweden March 20, 2006** - Drutt Corporation, the world leading Mobile Service Delivery Platform (MSDP) provider, today announces that Tele2, Europe's leading alternative telecom operator, has selected Drutt Portal, Drutt Rendering and Drutt 3rd Party Integration (3PI) as the core technology products for Tele2s new Wap Portal System solution.

Drutt Corporation will provide Tele2 with a multi-portal solution enabling multiple portal instances with one single platform, deployed centrally and manageable by country, or managed centrally, at the Tele2 headquarters. The Wap Portal System will consist of a single installation which will deliver multiple versions, deployed across Europe and Russia, resulting in the reduction of operating costs.

Proven scalability, performance in high-capacity environments and standards based integration, will enable Tele2 to keep integration costs under control and assure permanent availability of all mobile content and premium services to its large subscriber base.

Drutt Corporation has a solid understanding and experience of the industry, resulting in the development of practical technology applications that streamline the monetization of the mobile data services business. The Drutt MSDP fully addresses the greatest barrier to mobile adoption – poor user experience. With Drutt Rendering, the advanced content adaptation and transcoding engine, Tele2 can solve display issues for any type of mobile phone.

Drutt 3PI will provide Tele2 with an automated content partner management process that allows mass partnering and exponentially increase value added services integration. Together with Drutt Rendering and Drutt 3PI, Drutt Portal will provide Tele2 the freedom to merchandise any type of mobile data services into any mobile device and fit the needs of individual subscriber segments.

The Drutt Mobile Service Delivery Platform (MSDP) is an end-to-end multi-channel solution enabling mobile operators establishing a profitable mobile service delivery business. Drutt Corporation helps mobile operators to integrate and manage thousands of content partners, merchandise and monetize any type of content and premium services. The Drutt MSDP solution incorporates a complete product suite, featuring Drutt Portal, Drutt Rendering, Drutt 3PI, Drutt Messaging and Drutt Alerts.
